EDUCATION

KAIST, Daejeon PhD Candidate of Computer Science	<i>March 2022 - Current</i>
KAIST, Daejeon Master of Computer Science	<i>March 2020 - February 2022</i>
KAIST, Daejeon Bachelor of Computer Science	<i>March 2014 - February 2020</i>

RESEARCH INTEREST

Automated Test Generation, GUI Testing, Software Engineering with Natural Language Processing
With the belief that filling the gap between academic findings and industrial practice is a valuable research problem, I am mostly interested in connecting automated techniques with practical situations in software engineering.

PUBLICATIONS

Peer-Reviewed Conference and Workshop Papers

**: equal contribution*

Book Chapter

- 과학하는 용기 (Courage To Do Science). Salim Friends, 2016

WORKING EXPERIENCE

Artifriends Inc.

June 2017 - December 2018

Web/Blockchain Developer

- As a member of an early start-up company, I led the development of a web service for asset management, and participated in building a Blockchain client software based on Proof-of-Stake consensus algorithm.

SK Hynix

June 2016 - July 2016

Application Engineering Intern

- Assigned to an Application Engineering department, I briefly learned about testing SSD (Solid State Drive) hardware by detecting anomalous packets observed in SATA command layer protocol.

TECHNICAL STRENGTHS

Programming Language

Python, JavaScript, Golang, Java

Tools

Git, Docker

HONORS & AWARDS

Google Women Techmakers Scholarship

2019

- Selected as a recipient of 2019 APAC Women Techmakers Scholars Program

Dean's List

Autumn 2016

- Top 3% Academic Performance

TEACHING EXPERIENCE

CS454: AI Based Software Engineering

Autumn 2020

Teaching Assistant

- A course about metaheuristic optimisation algorithms for software engineering

CS101: Introduction to Programming

Spring 2020 - Spring 2022

Teaching Assistant

- A course for freshmen to teach programming skills and computational thinking

ACTIVITIES

VOK: Voice of KAIST

- Worked as an announcer in KAIST official broadcasting club
